

Project – Windows 11 Pro Clean Installation on a Formatted Laptop

Pendiente: Ninite video y foto. Muestra de foto de la nuevas particiones del PC.

Laptop Specifications

- Model: [Marca y modelo exacto]
- CPU: Intel Core i5/i7 (especificar si sabes)
- RAM: 8 GB / 16 GB
- Storage: 512 GB SSD (divided into C: and D:)
- Original OS: Windows 11 Home
- Target OS: Windows 11 Pro

Objective:

Format the internal drive of a personal laptop, create system and personal partitions, and perform a clean installation of Windows 11 Pro using official Microsoft tools. This project also includes post-installation configuration of drivers and essential software for daily use.

Tools Used

- Windows Media Creation Tool
 - Device Manager
 - Windows Update
 - NVIDIA App
 - Snappy Driver Installer Origin
 - Ninite (for bulk software installation)
 - Avast Antivirus (Trial)
-

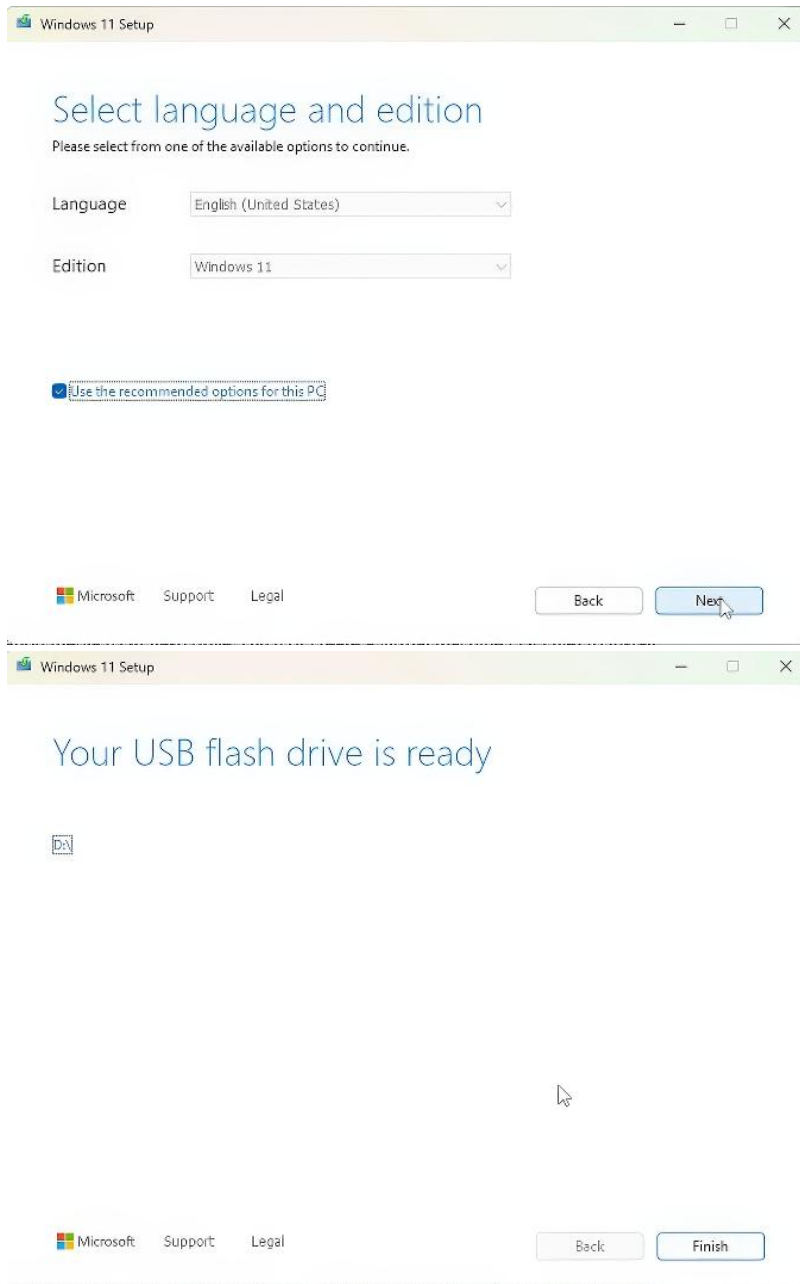

Initial Setup

- The laptop originally had Windows 11 Home.
 - All existing files were irrelevant; no backup was needed.
 - The internal drive was completely wiped.
 - Created 2 partitions:
 - C: System (Windows)
 - D: Personal files
 - Free space left for future Ubuntu installation
-

Installation Process

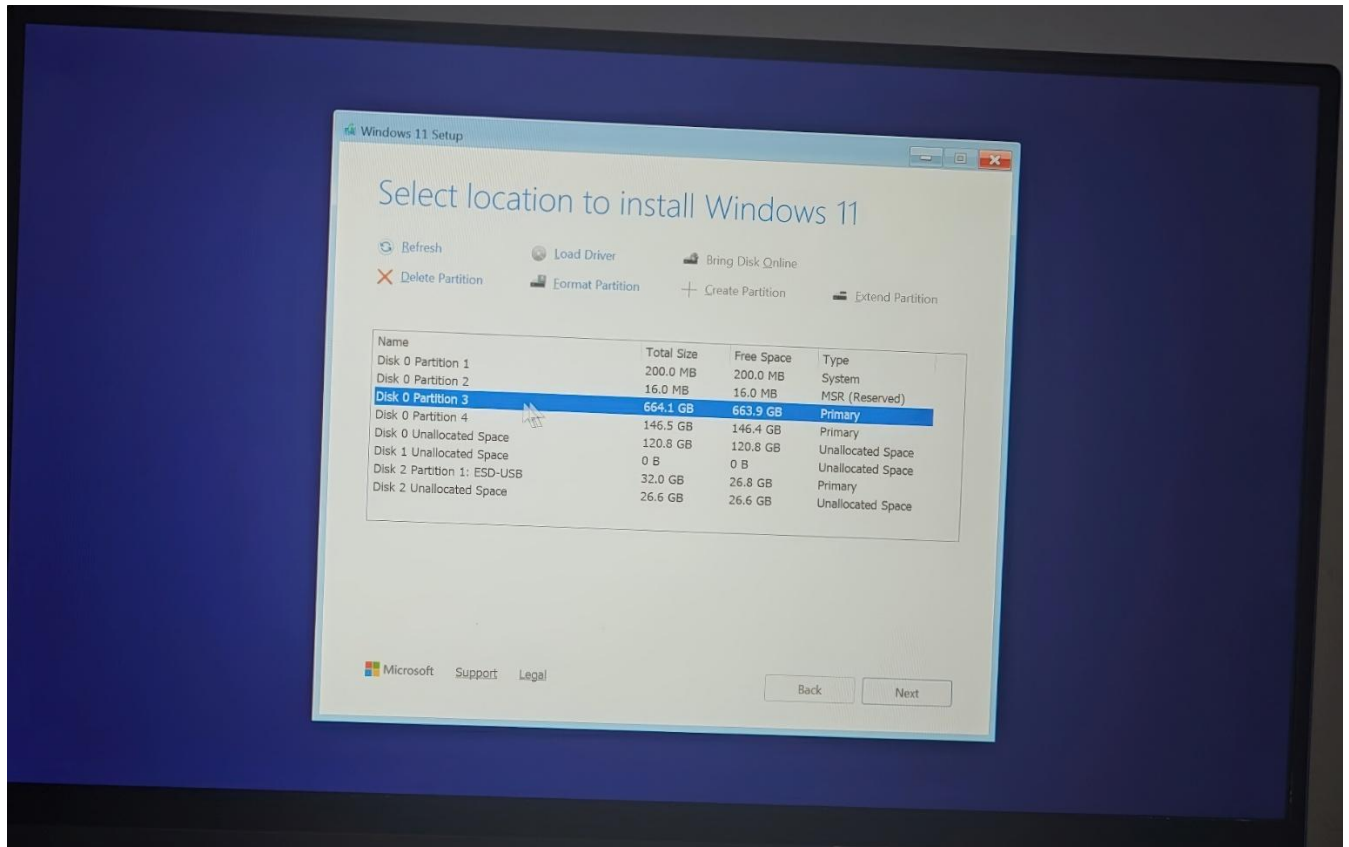

1. Bootable USB Creation

Used Windows Media Creation Tool to create a bootable USB with Windows 11 Pro.

2. System Installation

- Booted from USB
- Deleted all old partitions
- Created new partition layout
- Installed Windows 11 Pro on C: drive

Post-Installation Configuration

✓ Drivers & Updates

- Opened Windows Update and installed all available updates (including optional ones).

Windows Update

Updates available
Last checked: Today, 8:58 AM

Download & install all

Security Intelligence Update for Microsoft Defender Antivirus - KB2267602 (Version 1.431.294.0) - Current Channel (Broad)	Download & install
2025-06 Cumulative Update Preview for Windows 11 Version 24H2 for x64-based Systems (KB5060829)	Downloading - 0%
Intel Corporation - Bluetooth - 23.140.0.5	Downloading - 0%
Windows Malicious Software Removal Tool x64 - v5.134 (KB890830)	Download & install
Intel - net - 23.130.1.1	Downloading - 0%
Update for Windows Security platform - KB5007651 (Version 10.0.27840.1000)	Download & install
2025-04 Cumulative Update Preview for .NET Framework 3.5 and 4.8.1 for Windows 11, version 24H2 for x64 (KB5056579)	Downloading - 0%
Intel - net - 23.60.1.2	Download & install
Intel Corporation - System - 10/8/2018 12:00:00 AM - 30.100.1841.2	Downloading - 0%
Intel Corporation - System - 10/8/2018 12:00:00 AM - 30.100.1841.2	Downloading - 0%
INTEL - System - 7/18/1968 12:00:00 AM - 10.1.16.6	Downloading - 0%
INTEL - System - 7/18/1968 12:00:00 AM - 10.1.16.6	Downloading - 0%
INTEL - System - 7/18/1968 12:00:00 AM - 10.1.14.7	Downloading - 0%
Realtek Semiconductor Corp. - USB - 3/15/2018 12:00:00 AM - 10.0.16299.31241	Downloading - 0%
INTEL - System - 1/1/1970 12:00:00 AM - 10.1.1.42	Downloading - 0%
Intel - Other hardware - Intel(R) Xeon(R) E3 - 1200/1500 v5/6th Gen Intel(R) Core(TM) PCIe Controller (x16) - 1901	Downloading - 0%
Intel - System - 4/12/2017 12:00:00 AM - 14.28.47.630	Downloading - 0%

More options

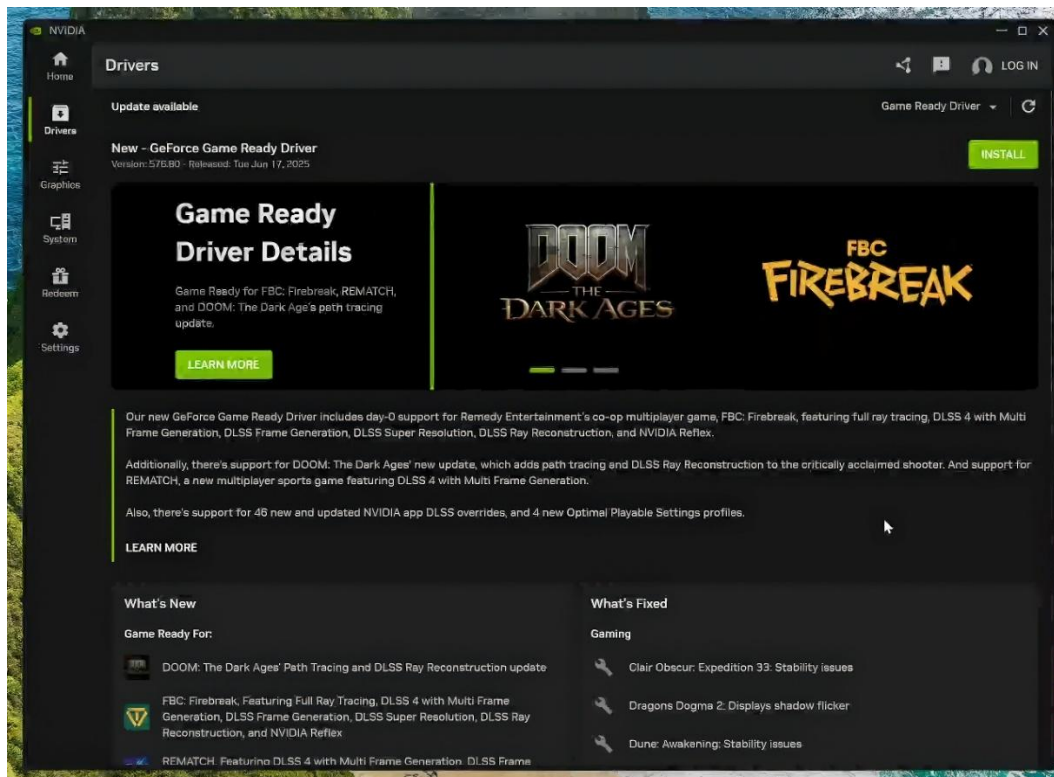

Get the latest updates as soon as they're available
Be among the first to get the latest non-security updates, fixes, and improvements as they roll out. [Learn more](#)

Off ☐

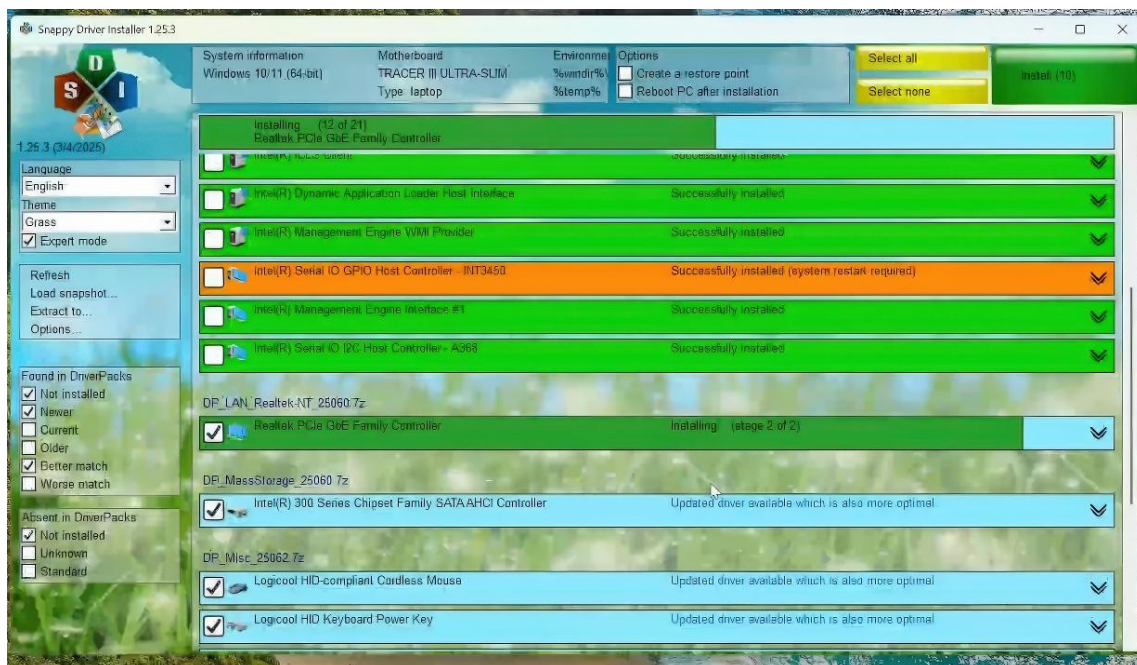

Pause updates

Pause for 1 week 

- Used NVIDIA App to install the latest graphics drivers.

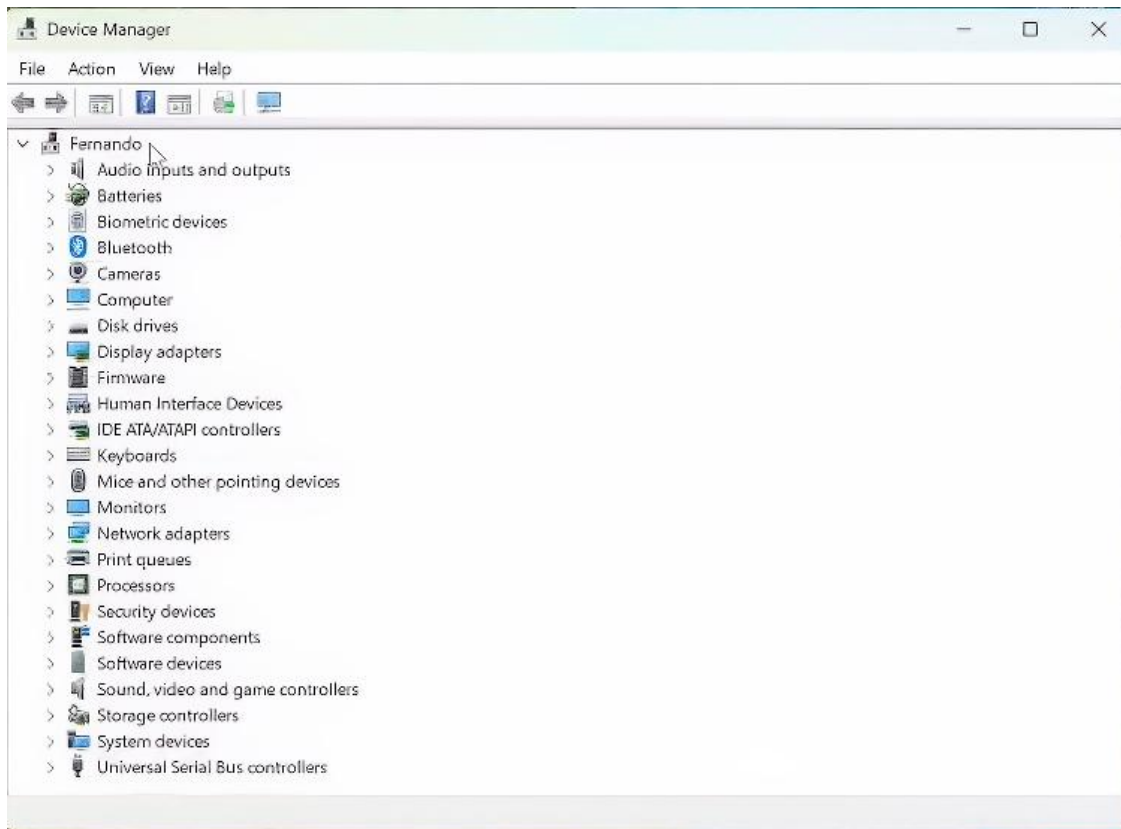

- Used Snappy Driver Installer Origin to detect and install any missing or outdated drivers

- Restarted system after each installation phase.

- Verified that all devices were correctly detected using Device Manager.

To speed up setup for daily use, I installed multiple apps using [Ninite](#):

- .NET 4.8.1
- Discord
- Firefox
- GIMP
- Audacity
- Notepad++
- Opera
- Spotify
- TeamViewer 15
- Visual Studio Code
- VLC Media Player
- WinRAR

✅ Final Result

The laptop is now running Windows 11 Pro, fully updated and secure. All drivers are working, and the system is ready for work, study, or daily tasks. This project demonstrates my growing experience in:

- System formatting and OS installation
- Partition management
- Driver verification and update
- Safe installation of trusted software
- Post-installation optimization

🔗 Official Tool Links & Descriptions

Here are the official tools I used in this project, with links and a short explanation of each:

- **[Windows Media Creation Tool](https://www.microsoft.com/en-us/software-download/windows11)**
Microsoft's official tool to create bootable USB drives with the latest version of Windows 11. It ensures a clean and up-to-date installation.
- **Snappy Driver Installer Origin** (https://sdi-tool.org/)
A free and open-source utility used to find and install missing or outdated drivers. Ideal when the manufacturer tools are not available or for offline use.
- **Ninite**(https://ninite.com)
A professional-grade installer that automatically installs and updates multiple essential apps at once, without adware or unnecessary prompts. Useful for setting up daily-use software quickly and safely.
- **NVIDIA GeForce Experience** (https://www.nvidia.com/en-us/software/nvidia-app/)
NVIDIA's official app to install and update graphics card drivers, optimize game settings, and manage GPU features.
- **Windows Update**
Integrated into Windows. Automatically checks for system updates, driver packages, and security patches from Microsoft's trusted sources.
